# THEFT DETERRENT SOLUTIONS

## Every 33 seconds, an auto theft occurs.

That's 1 million vehicles costing an estimated \$6.4 billion each year. According to the National Insurance Crime Bureau (NICB), vehicle theft is the nation's number one property crime.

Nearly half are never recovered – resold to unsuspecting consumers, or stripped and sold for parts – and the percentage that are reacquired are usually found with significant and costly damage.

To prevent and deter auto theft from happening to you, the NICB recommends the layered approach – the more layers of protection on your vehicle, the more difficult it is to steal.

Premier invests in the latest technology to bring you inexpensive and yet highly effective solutions – invaluable layers of added security – to help prevent your vehicle from being stolen.

The Premier Theft Deterrent System offers you layers of protection that are clearly visible and alert thieves that your vehicle is protected.

Need another incentive? Installation may qualify you for a discount from your insurance carrier. Plus our theft deterrent products are all accompanied by a Limited Warranty – providing a benefit payment in the unlikely event that your vehicle is stolen and not recovered.
